

Handbook of Financial Embezzlement

A first handbook for wheeler dealers and embezzlers

Written by **Anders Allander**

The artist and author Anders Allander has a broad experience of work within international industry – as responsible manager as well as a consultant in technical, economical and commercial issues. This book is mainly based upon own experiences of life in Sweden as well as in Argentina.

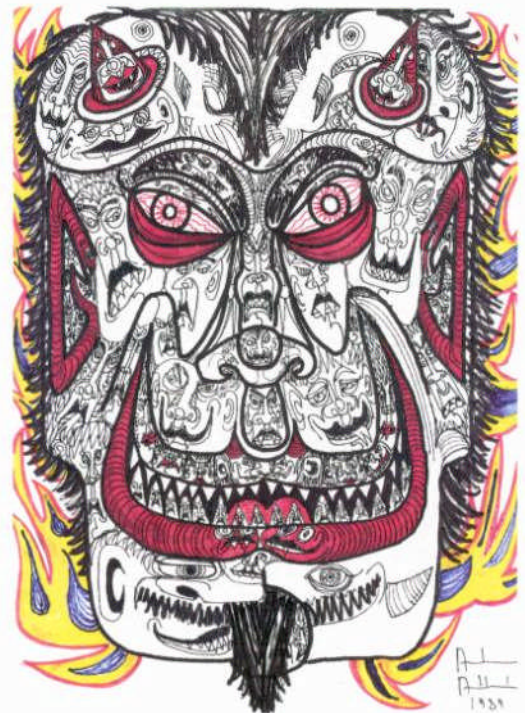

This first book for embezzlers is followed by a second book **Handbook for Ineffective persons** which also is based upon his experiences of the activities of ASEA-corporation in Argentina. It contains 90 pages.

The piece of art **Satan** created by Anders Allander is one of many (black and white) surrealistic, imaginative and thrilling pictures in the book. It illustrates a wheeler dealer who exploits his personnel.

This handbook of 100 pages is very useful especially for incompetent and greedy managers who anyway want to seem clever and create some results that gives the impression to be positive. This can be done at the same time as the company is drained from money for own personal benefits.

This may be done exploiting competent personnel, colleagues, the share holders and superior managers.

Invest in the book! Here you can find many good methods for improvements of your future career and economy!
